

To make a fresh crepe has never been so easier! Designed to be efficient and easy to use, the series machines own a compact structure as well as simple appearance design and quality heating elements. Most of them are countertop models, the small size with high capacity is ideal for little prep areas or food truck where is limited. We also have mobile crepe making machine, combined with sauce station and cart, very convenient for moving outside.

As a kind of snack equipment, crepe maker create a new way to cook food what we can in daily meal. Thus, delicious golden pancakes, buckwheat cakes, Indian tempura, Indonesian chapatti, blini are made and the machine is also popular in Asian cuisine to prepare Peking duck.

A wide range of [crepe machines](#) with enamelled cast-iron plate (Ø350 & 400 mm) for crepes:

Electric type: Non-stick cast-iron plate with 2 tube heating elements underneath. Adjustable thermostat from 60°C to 300°C. High power heating elements are directly molded into the cast-iron plate and fixed with 2 counter-plates and insulating material. Evenly heat distribution. Gas type: Non-stick cast-iron plate. Features: Piezo lighting system, control knob with low position, safety thermocouple.

High capacity crepe machines are built with stainless steel base & cast iron cook plate top. 2 tube heating elements under the cooking area for perfect heat distribution. Thanks to a combination of a non-stick surface and heat conductive material, the crepe machine surface can heat up quickly and evenly.
