

To roast delicious meat for your shawarma with the [shawarma making machine](#)!

These machines feature rapid heating-up and can hold enough meat at a time, giving you a large quantity of meat to work with throughout the day. Shawarma can be served on a plate (generally with accompaniments), or as a sandwich or wrap.

Rotary support provides ample space for lamb, chicken, turkey, beef, veal, or mixed meats, and the burners are sure to cook and keep the meat warm at all times.

The whole unit is made of stainless steel for long-lasting durability, while a convenient grease drawer prevents spills. And thanks to the included stainless steel meat shovel, picking up scrap meat has never been easier.

To give you total control over cooking, the broiler boasts a unique adjustable skewer and a convenient automatic slip clutch that stops the skewer's rotation during slicing for quick and easy carving. It also features adjustable heat shields that maintain operator comfort and allow for faster cooking to maximize efficiency and reduce energy costs.

Counter top type, single row, visible heating element or infrared burners for rapid heat-up, even roasting.

Free-standing type, with bottom cabinet, use infrared burner to make heating quickly and ensure excellent roasting performance. Equipped with energy-saving explosion-proof lights.
